Guidelines for Display Rules & Regulations

The following Guidelines for Display Rules and Regulations have been established in accordance with guidelines set forth by All Baby & Child (ABC), based on those established by the International Association of Exhibition and Events (IAEE).

The IAEE Guidelines for Display Rules and Regulations were originally created to promote continuity and consistency among North American exhibitions. Since their introduction, they have become the model for most domestic exhibitions.

This All Baby & Child, Corp. 2014 revised edition of Guidelines for Display Rules and Regulations is intended to be used as a resource for exhibitors and Show Management in creating consistent and fair exhibiting standards for all of the organization’s events. The text and illustrations have been clarified and updated with the intent of affording exhibitors a maximum return on the exhibit investments. Compliance with fire, safety, Americans with Disabilities Act (ADA), and other government requirements have also been addressed. However, due to ever-changing federal, state and local policy and code revisions always check with local venue and exhibition service contractors for updates to local regulations.

It is All Baby & Child’s goal that by establishing these Guidelines for Display Rules and Regulations, each exhibitor shall be provided with all the information necessary to properly design and build exhibitors, as well as plan their booth’s layout and content. Information regarding the professional standards of decorum expected of exhibitors can be found in the All Baby & Child’s policy material and contracts. Our goal is to assure all exhibitors, regardless of exhibit size or location, an environment conducive to successful interaction with their audiences.

All Baby & Child, Corp. for use by and for events produced by this organization in all venues. These regulations are based on guidelines developed by IAEE for use by its members.
In-line Booth

In-line (or Linear) Booths are generally arranged in a series along a straight line and have neighboring exhibitors on their immediate right and left, leaving only one side exposed to the aisle.

Dimensions

For purposes of consistency and ease of layout and/or re-configuration, floor plan design in increments of 10ft (3.05m) has become the de facto standard in the United States. Therefore, unless constricted by space or other limitations, In-line Booths are most commonly 10ft (3.05m) wide and 10ft (3.05m) deep. A maximum back wall height limitation of 8ft (2.44m) is specified.

Use of Space

Regardless of the number of In-line Booths utilized, (e.g. 10ft x 20ft, 10ft x 30ft, 10ft x 40ft or 10ft x 50ft), display materials should be arranged in such a manner so as not to obstruct sight lines of neighboring exhibitors. The maximum height of 8ft (2.44m), including signage, is allowed only in the rear half of the booth space, with a 4ft (1.22m) height restriction imposed on all materials in the remaining space forward to the aisle.

Overhead Signs

Hanging overhead signs are not permitted for In-line Booths; nor may any signage, etc. extend beyond the 8ft (2.44m) height restriction.

Corner Booth

A Corner Booth is an In-line Booth at the end of a series of linear booths with exposure to aisles on two (2) sides. All other guidelines for In-line Booths (above) apply.
Guidelines for Display Rules & Regulations

*For the ABC Kids Expo – Pipe and drape will consist of 10ft (3.05m) wide x 8ft () tall pipe and drape as the back ‘wall’ and 3ft (.91m) tall x 10ft (3.05m) deep side pipe and drape for the side ‘walls’.

**End-Cap Booth**

An End-Cap Booth is exposed to aisles on three (3) sides and composed of a minimum of two (2) 10ft (3.05m) x 10ft (3.05m) booths.

**Dimensions**
End-Cap Booths are 20ft (6.09m) wide and a minimum of 10ft (3.05m) deep.

**Use of Space**
The maximum back wall height of 8ft (2.44m), including signage, is allowed only in the 10ft (3.05m) center portion of the booth. A maximum height of 4ft (1.22m) is allowed on the two (2) 5ft (1.52m) ‘wings’, permitting adequate line of sight for the adjoining In-line Booths.

**Overhead Signs**
Hanging overhead signs are not permitted for End-Cap Booths; nor may any signage, etc. extend beyond the 8ft (2.44m) height restriction in the center 10ft (3.05m) or above the 4ft (1.22m) height restriction on the two (2) 5ft (1.52m) ‘wings’.
Guidelines for Display Rules & Regulations

*For the ABC Kids Expo – The back ‘wall’ will consist of 10ft (3.05m) wide x 8ft (2.44m) tall pipe and drape. On each 5ft (1.52m) ‘wing’ there will be a 3ft (.91m) tall x 5ft (1.52m) wide pipe and drape.

**Split Island Booth**

A Split Island Booth is an Island Booth which shares a common back wall with another Island Booth and is exposed to aisles on three sides.

**Dimensions**
Split Island Booths are a minimum of 20ft (6.09m) wide x 20ft (3.05m) or larger, deep.

**Use of Space**
The entire cubic content of this configuration may be used, up to the maximum allowable height, without any back wall line of sight restrictions. 16ft (4.877m) is the maximum height allowance.

**Overhead Signs**
Overhead signs are permitted for Split Island Booths 20ft (6.09m) x 20ft (6.09m) or larger. Height limitation from the floor to the bottom of the sign is 16ft (4.87m) and must be directly over contracted space only.
Guidelines for Display Rules & Regulations

Island Booth

An Island Booth is a 20ft (6.09m) x 20ft (6.09m) or larger sized booth which is not directly adjacent to any other booth and is typically (but not always) exposed to aisles on all four sides.

Dimensions
Island Booths are a minimum of 20ft (6.09m) x 20ft (6.09m) or larger, although it may be configured differently.

Use of Space
The entire cubic content of this configuration may be used, up to the maximum allowable height, without any back wall line of sight restrictions. 16ft (4.877m) is the maximum height allowance.

Overhead Signs
Overhead signs are permitted for Split Island Booths 20ft (6.09m) x 20ft (6.09m) or larger. Height limitation from the floor to the bottom of the sign is 16ft (4.87m) and must be directly over contracted space only.

All Baby & Child, Corp. for use by and for events produced by this organization in all venues. These regulations are based on guidelines developed by IAEE for use by its members.
Other Important Considerations

**Towers and Canopies**
A Tower is a free-standing exhibit component separate from the main exhibit fixture. The height restriction is the same as that which applies to the appropriate exhibit space configuration being used.

A Canopy (frame) can be either decorative or functional. Canopies for In-line and End-cap booths should comply with Line-of-Sight requirements. Canopy supports are to be no wider than three inches 3in (.08m).

**Ceilings**
Ceilings are not permitted for Inline-line and End-cap booths.

**Hanging Signs & Graphics**
Hanging signs are allowed for Split Island and Island booths 20ft (6.09m) x 20ft (6.09m) or larger. In-Line, Corner and End-Cap booths do not qualify for hanging signs. Height limitation from the floor to the bottom of the sign is 16ft (4.87m) and must be directly over contracted space only.

**Multi-story Exhibit**
A Multi-story Exhibit is a booth where the display fixture includes two or more levels. Multi-storied Exhibits require prior approval by the exhibit facility, relevant local government agency, as well as show management. The city building department needs to issue a building permit based on an application and drawings prepared and submitted by a licensed architect or engineer. Exhibitors should obtain local building regulations. All other Las Vegas Convention & Visitors Authority rules and regulations must be followed.

**Smoke Detectors**
All areas that are enclosed by solid walls and ceilings must be provided with approved smoke detectors which are audible outside the area of the booth. A fire watch may also be required.
Guidelines for Display Rules & Regulations

Issues Common to All Booth Configurations

Americans with Disabilities Act (ADA)
All exhibiting companies are required to be in compliance with the Americans with Disabilities Act (ADA), and are encouraged to be sensitive, and as reasonably accommodating as possible, to attendees with disabilities. Information regarding ADA compliance is available from the U.S. Department of Justice ADA Information Line, (800) 514-0301, and from the ADA website at www.usdoj.gov/crt/ada/adahom1.htm.

Structural Integrity
All exhibit displays should be designed and erected in a manner that will withstand normal contact or vibration caused by neighboring exhibitors, hall laborers, or installation/dismantling equipment, such as forklifts. Displays should also be able to withstand moderate wind effects that may occur in the exhibit hall when freight doors are open. All Split Islands, Islands and any booth over 600sq ft are required to submit a booth layout to All Baby & Child by the specified deadline.

Vehicles
Any use of a vehicle within the exhibit space must be pre-approved by Show Management at least 90 days prior to show set-up.

Flammable and Toxic Materials
All materials used in display construction or decorating should be made of fire retardant materials and be certified as flame retardant. Samples should also be available for testing. Materials that cannot be treated to meet the requirements may not be used. A flame-proofing certificate should be available for inspection. Exhibitors should be aware of local regulations regarding fire/safety and environment which must be adhered to.

Exhibitors should dispose of any waste products they generate during the exhibition in accordance with guidelines established by the Environmental Protection Agency and the facility.

Lighting
Exhibitors should adhere to the following guidelines when determining booth lighting:

- No lighting, fixtures, lighting trusses, or overhead lighting are allowed outside the boundaries of the exhibit space.

All Baby & Child, Corp. for use by and for events produced by this organization in all venues. These regulations are based on guidelines developed by IAEE for use by its members.
Guidelines for Display Rules & Regulations

- Lighting, including gobos, should be directed to the inner confines of the booth space. Lighting should not project onto other exhibits or exhibitions aisles.
- Lighting which is potentially harmful, such as lasers or ultraviolet lighting, should comply with facility rules and be approved in writing by Show Management.
- Lighting that spins, rotates, pulsates, and other specialized lighting effects should be in good taste and not interfere with neighboring exhibitors or otherwise detract from the general atmosphere of the event.
- For additional lighting information please see the LVCC requirements located in the Exhibitor Kit.

**Balloons**

Balloons of any type are not permitted on the show floor.

**Storage**

Fire regulations prohibit storing product, literature, empty packing containers, or packing materials behind back drapes or under draped tables.

**Demonstrations**

As a matter of safety and courtesy to others, exhibitors should conduct sales presentations and product demonstrations in a manner which assures all exhibitor personnel and attendees are within the contracted exhibit space and not encroaching on the aisle or neighboring exhibits. It is the responsibility of each exhibitor to arrange displays, product presentation, audio visual presentations, and demonstration areas to ensure compliance. Exhibitors should be aware of local regulations regarding fire/safety and environment which must be adhered to.

Special caution should be taken when demonstrating machinery or equipment that has moving parts or any product that is otherwise potentially dangerous. Exhibitor should establish a minimum setback of 3ft (.91m) and/or install hazard barriers as necessary to prevent accidental injury to spectators. Additionally, any service or preparation of food must be approved by Show Management.

**Sound/Music**

Exhibitors may use sound equipment in their booths so long as the noise level does not disrupt the activities of neighboring exhibitors. Speakers and other sound devices should be positioned so as to direct sound into the booth rather than into the aisle. Sound and noise should not exceed 85 decibels when measured from the aisle immediately in front of a booth.

Exhibitors should be aware that music played in their booths, whether live or recorded, may be subject to laws governing the use of copyrighted compositions. ASCAP, BMI, and SESAC are three authorized licensing organizations that collect copyright fees on behalf of composers and publishers of music.

All Baby & Child, Corp. for use by and for events produced by this organization in all venues.
These regulations are based on guidelines developed by IAEE for use by its members.
Should the above rules and regulations not be followed an exhibitor will be given three warnings. If the infraction is not corrected by the third warning Show Management and Security will close the booth until the infraction is corrected.

For any questions please contact the ABC office at (210) 691-4848.
